

XM Radio has been the best investment in entertainment I have made. I enjoy the commercial-free music, and since this is a subscription service, I do not feel it is right for the FCC to mandate what can be broadcast. The people who are willing to pay for the service should be able to reap the benefits that it provides. Those include the commercial free music, as well as the traffic and weather for each person's local area. I oppose HR 4026 and will encourage others to voice their opinions as well.
